Stack Trace

Frontend:

- HTML5/CSS3 – Accessibility, Responsiveness
- JavaScript – ES7+, Vanilla, TypeScript, Flow
- React – Hooks, Gatsby/Next, Apollo, PWAs
- Vue – Vuex, Directives, Data Manipulation

Backend:

- Node.js – Express, SSR, MVC, Building APIs
- Java – Academic Experience, OOP, Algorithms
- GraphQL – SQL/NoSQL, Resolvers, Security
- AWS – S3, EC2, Elastic Beanstalk, SES, SNS
- Digital Ocean – SSH, Nginx, Deployment
- Firebase – Auth, DB, Functions, Storage

Tooling:

- CI/CD – CircleCI, Docker, Appium, Selenium
- Testing – Jest, Mocha, Jasmine, Fixtures
- Git – Team Flows, Data Recovery, Code Review

Interests

- Hardcore **film fanatic**, especially Edgar Wright's work (and horror movies)
- Volunteering with tech: **#HourOfCode**, **Women in STEM**, and **UW Blueprint** (to namedrop a few).
- Total **podcast junkie**, top picks include: *Cortex*, *Syntax*, *MBMBAM*, *Reply All*
- **Board game geek** at heart, loving *Spirit Island*, *Dead of Winter*, and *Coup*
- An absolute, unwavering **dog person**

Education

- Nanotechnology Engineering, University of Waterloo, 2021
- Plenty of online courses, certifications and learning modules, including
 - > freeCodeCamp.org
 - > Wes Bos Courses
 - > egghead.io

Summary of Qualifications

- Self-taught **full-stack developer** with an expansive online portfolio of **cool projects**
- Avid interest in **programming** in general; following podcasts, newsletters and picking up new tech **just to keep it fresh**
- Experience with **startups**, **corporations**, and **volunteer-teams**; practicing agile development, and shipping code weekly

Work Experience

Full-Stack React Native Developer – Winter 2019 (4m)

Shop Bonsai – Toronto, ON

- Built, and shipped feature sets in weekly app updates throughout the term
- Repaired E2E tests in CircleCI and refactored GraphQL API resolvers/queries in React Native to improve extensibility

Skills Improved: React Native, Apollo + GraphQL, CircleCI, iOS/Android, Docker

Advanced App Engineering Senior Analyst – Fall 2018 (4m)

Accenture – Toronto, ON

- Deployed cross-platform React widgets through peer programming and test-driven development
- Implemented Google Cloud Dialogflow to train, and deploy Virtual Agents with natural language processing

Skills Improved: ES6 JS, React, Node.js, DynamoDB, AWS Suite, Dialogflow

Projects & Neat Stuff

Custom URL Shortener – lgr.fyi

Clean up ugly links with this Vue x Node App living in the Digital Ocean

Twitter CLI via Node – npmjs.com/package/twitter-cl

A little open source CLI tool for those allergic to the Twitter UI

High Fashion Retail App – sick-fits.leanderr.now.sh

A fully-functional clothing store, with React (Next), Stripe, GraphQL, and Apollo. A bit slow to start, but I blame Heroku's free tier for that!

Conway's Game of Life – conway.leander.xyz

Visualize evolution as an oversimplified game in React! + Dark Mode!

A Pretty Rad Showcase – leander.xyz/projects

A static JAMstack site built with Gatsby, React, Markdown and Netlify. It holds all my notes, blog posts, and plenty more projects too!
